Tertu TimberRail

Tertu TimberRail is a permanent vehicle restraint system (VRS), that combines the strength of steel with genuine Douglas Fir timber to protect vehicle occupants and roadside assets while providing a natural aesthetic. With an anticipated service life of at least 20 years, it is the ideal solution for any location where appearance is as important as performance.

- The largest range of timber clad vehicle restraint barrier available
- Bridge parapet and pedestrian parapet options are available
- Standard post spacing of 4m reduces costs and installation times
- A variety of W2-W7 containment levels, working widths and post spacing options available
- Made with renewable Douglas Fir and completely recyclable at the end of its service life
- Suitable for installation with P4 end terminals, motorcycle protection and pedestrian handrails
- UKCA marked systems available within the range

Technical Specifications

Varied dimensions to suit site requirements

Tested in accordance with EN1317-2, CE rated and ISO 9001 certified

Containment levels and working width class:

N1 W5, N2 W2-7, H2 W4-5
