# Falcon Automated Cone Laying Machine (ACLM)

Designed to improve the safety of cone laying operations, while supporting enhanced efficiency for highways projects, the Falcon automated cone laying machine (ACLM) enables cones to be laid and removed without the need for any operatives at the rear of the vehicle.

Endorsed by National Highways following rigorous factory, off-road and on-road testing, the Falcon ACLM can drop or collect cones in less than 10 seconds, enabling efficient and consistent cone laying operations while preventing highways operatives from being exposed to the risks of musculoskeletal injury and live lanes of traffic.

- GG104 safety risk assessed
- Drops seven cones per minute
- Only requires a driver to operate the vehicle
- Collects six cones per minute

## Safety Benefits

- Protection from traffic
- Eliminates exposure to traffic fumes and noise
- Reduced distraction for drivers
- Removes cone 'walking in' requirements
- Reduces operatives fatigue
- Prevents the risk of musculoskeletal injury
- Avoids the need for operatives to work outdoors in inclement weather

# Innovative Solutions For A Safer Future

We are specialists in protecting people, places, infrastructure and communities around the world. You can rely on us for:

- Market-leading solutions
- Technical knowledge
- Responsive customer service
